WHAT WE DO

ESTABLISHED IN 1974, ALSPEC ARE THE MARKET LEADERS IN THE DESIGN AND DISTRIBUTION OF INNOVATIVE ALUMINIUM SYSTEMS TO THE ARCHITECTURAL, INDUSTRIAL AND HOME IMPROVEMENT MARKETS.

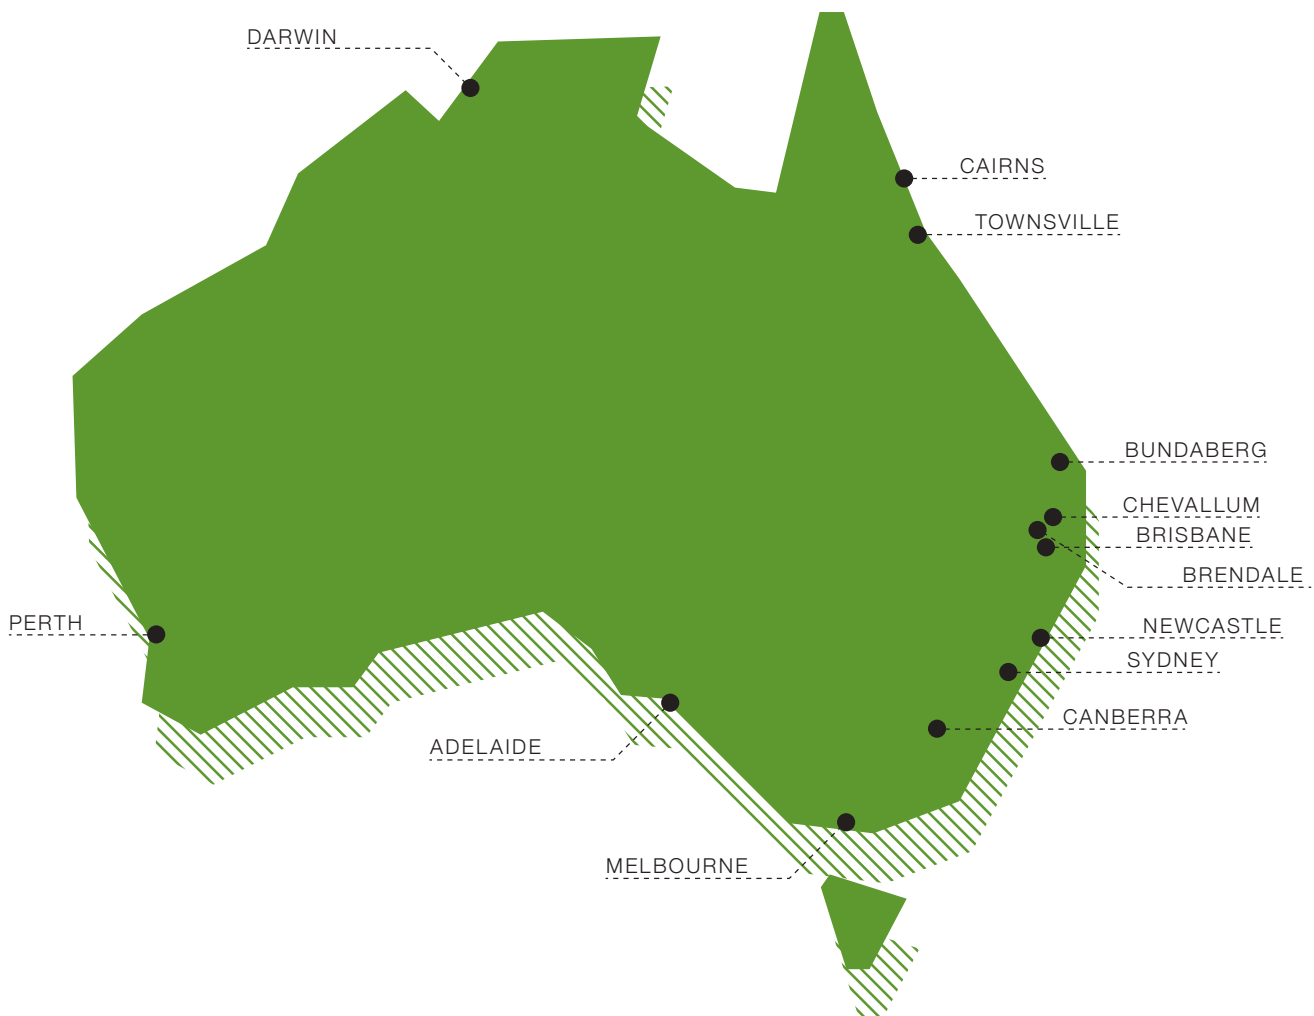

THIS BROCHURE HAS BEEN DESIGNED FOR THE LOCAL TRADESMAN WHO CAN QUICKLY REFERENCE A PRODUCT AND SEE WHERE ITS IN STOCK.

PLEASE NOTE, STOCKED AVAILABILITY IN ALL BRANCHES IS CORRECT AT THE TIME OF PRINTING. THIS IS SUBJECT TO VARIATION AND IS NOT A GUARANTEE THAT STOCK WILL BE AVAILABLE AT TIME OF ORDER.

DISTRIBUTION NETWORK

With a national network of over 650 staff and 13 locations, Alspec is a wholly Australian-owned private company at the forefront of the Australian Aluminium Distribution market. Alspec's long established history of robust financial integrity has positioned the company well to respond to increasingly sophisticated customer requirements.

Alspec have invested heavily in research and development to ensure a continual supply of ground-breaking systems, improved products and new technology. This includes our own NATA accredited testing facility in Brisbane where we test window and door systems to ensure they meet all of the required air and water penetration standards.

INDUSTRIAL CAPABILITY

As one of Australia's largest specialist aluminium distributors, Alspec utilises a wide range of proven supply partners to ensure we have competitive fit for purpose product to meet our customer's requirements. Our industrial range includes both mill and pre-finished sheet, mesh, extrusions and plate. Furthermore, Alspec can offer a wide range of hardware related products to complement our aluminium range. These products include:

- D&D gate hardware
- Sealants
- End caps
- Lock hardware
- Fasteners (rivets & screw)
- Glazing rubber to suit glazed balustrades

With our large and diverse product offer, Alspec is well positioned in the industrial segment to offer competitive supply solutions for our customers in the following markets:

- General fabrication
- Sheetmetal
- Signage
- Marine
- Automotive body building
- Lighting
- Fencing
- Solar and Sun control
- Home Improvement

TYPICAL ALUMINIUM ALLOYS FOR INDUSTRIAL APPLICATIONS

Extrusion

The most common form of extrusion in the Australian market are extrusions in the 6000 series.

6000 Series alloys contain silicon and magnesium in approximate proportions to form magnesium silicide, thus making them capable of being heat treated. Though less strong than most of the 2000 or 7000 alloys, the magnesium-silicone alloys possess good formability and corrosion resistance, with medium strength. Alloys in this heat –treatable group maybe formed in the T4 temper (solution heat treated but not artificially aged) and then reach full T6 properties by artificial ageing.

Rolled Products (Sheet, Coil, Treadplate and Plate)

The three forms of aluminium produced by rolling are foil, sheet and plate. The principle distinction between these forms is product thickness. In the Australian distribution market, Plate is generally 4mm or greater, Sheet is over 0.15 to 3.0mm and foil is the material 0.15mm or less in thickness.

All three forms begin with the rolling of heated rolled ingot. Depending on the alloy, the ingots are heated to temperatures in the 400-500oC range so that the material can be reduced to the required thickness, usually between 2.50mm and 12mm thick. Further reductions to final thickness are usually achieved by cold rolling.

Sheet and plate are generally available in the following forms:

- Sheet
- Coil
- Plate
- 5 bar Tread plate
- 1 Bar Propeller Plate

Alspec has developed strict criteria when evaluating potential rolling mills for the supply of sheet and coil products for the Australian market. These criteria include (but are not limited to):

- Manufacturing process
(DC vs CC ingot production)
- Alloy purity and scalping processes
- Surface finish and flatness
- Certification and quality control
- Anodising suitability
- Reliability
- Packaging standards
- Competitiveness
