

TraXtar™ Duo

High Performance on Two Wheels

proudly partnered with

Suitable for existing rail profiles

Machined polymer wheels for superior durability and reliability

Single bogey carriage design ensures balanced load distribution guaranteeing smooth system operation

Adjustment Bolt

Features

- 110kg weight capacity making it ideal for panel weights of up to 220kg.
- 36mm wheel diameters.
- Corrosion proof housing with anti-corrosive adjusting mechanism make it ideal for corrosive environments.
- Modular design with customisable side spacers and mounting tabs make it adaptable to various systems.
- Fits within standard systems for easy upgrades.
- CNC machined wheels available in polymer or stainless steel for increased durability.
- Polymer wheels reduce track wear ensuring the product retains its performance over time, making it an ideal option for aluminium tracks.
- Sealed precision bearing components for reliability and reduced risk of corrosion.

Product Options

- Standard models available in stainless steel or polymer wheels
- 12.5mm adjustment range
- Custom spacers and mounting and mounting tabs available upon request

OPENING FORCE (tested on a ProGlide Door)			
ROLLER	PANEL WEIGHT		
	100 kg	150 kg	220 kg
TraXtar™ Duo Roller	2.5 kg	2.5 kg	3.6 kg
'Competitor A' Roller	6 kg	7.4 kg	9.7 kg
