WELCOME TO THE HALLIDAY + BAILLIE / ALSPEC PRODUCT LIST

Halliday + Baillie have proudly worked alongside Alspec to find perfect solutions for several Alspec Hinged and Sliding joinery sections from within the Halliday + Baillie range.

With a few tweaks, plus the addition of H+B manufacturing some necessary parts, we have been able to provide seamless solutions that provide both form + function, and beautiful aesthetics for the Alspec range.

The following pages in this manual will provide you with complete kit options that you are able to order through Alspec.

Dependent on your frame type and closing requirement (see section details inside each kit number), there are lock tabs, strikes for ProGlide meeting and corner stiles, special adjustable strikes, that will be included when you purchase your individual kits. Simply add your key cylinder. With the hinged door kits you will need to add the correct strike plate as well as the cylinder and you are good to go.

Contact H+B and /or your local Alspec representative for more information or where you are able to see a sample.

Enjoy the manual!

Tanya Rive

Director | Halliday + Baillie Pty Ltd

THE FINISHES

Halliday + Baillie hardware is available in the following durable high-quality finishes. .

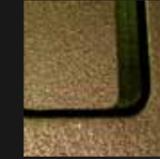

SC: Satin Chrome

EFW: Powder Coat
Electro™ Flat White

EBA: Powder Coat
Electro™ Black Ace

EMB: Powder Coat
Electro™ Medium Bronze

EDB: Powder Coat
Electro™ Dark Bronze

A general note on electroplating: Electroplating is done by passing an electric current through a solution that contains metal and the object being plated. The current causes the metal in the solution to be attracted to the object and to bond with it.

SC: To achieve the soft satin chrome finish, items are coppered and then applied with a special satin nickel plating process. In conjunction with a three stage polishing process this produces a smooth satin result that is then over-plated with chrome. Our satin chrome finish is suitable for both interior and exterior use, where durability is required.

EFW, EBA, EMB & EDB: Unlike anodized finishes Electro™ powder coatings can be applied to a wide variety of substrates. Electro™ finishes are highly durable and made from UV resistant materials. No liquid chemicals, solvents or caustic solutions are used in the manufacture of the Electro™ powder coatings and Electro™ powder coatings have a negligible VOC content. This range of coatings are suitable for a range of climatic conditions, from hot to cold and humid to dry. Please note Electro™ Medium Bronze has a pearlescent or metallic content rather than a standard flat paint finish.

VALIDITY

This product list is effective as of January 2021 and cancels and supersedes all prior information.

HB 640 SERIES

Narrow

The Halliday + Baillie HB 640 sliding door lock set series allows several snib and key lock functions for sliding doors. Sliding the snib on either side operates the bolt unless a cylinder is engaged. A cylinder will lock the snib; the key does not operate the bolt.

It is designed for use with Alspec's ProGlide, Hawkesbury Top Hung and Swan Evo Sliding Panel.

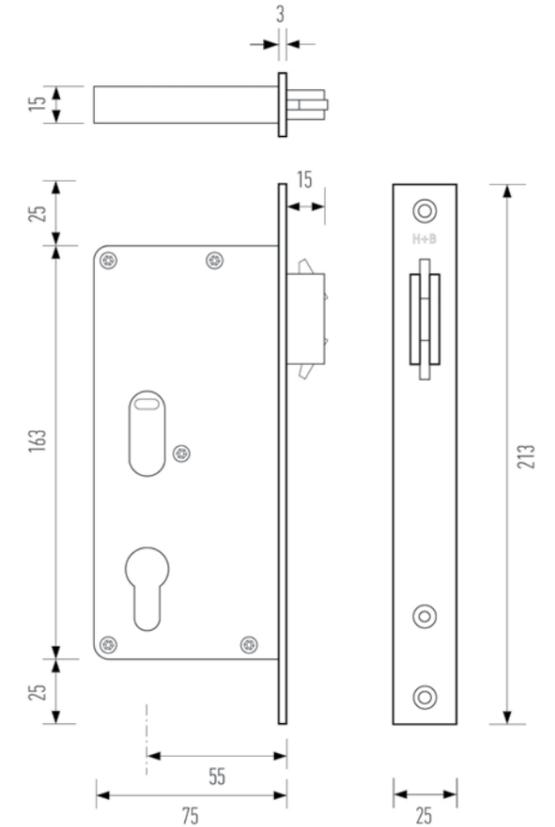

Material:
Diecast zinc with brass and 316 stainless steel

Backset:
33mm

Minimum door thickness:
38mm

HB 630 SERIES

Wide

The Halliday + Baillie HB 630 sliding door lock set series function like the HB 640 series, but with a wider backset of 55mm.

It is designed for use with Alspec's ProGlide, Hawkesbury Top Hung and Swan Evo Sliding Panel.

Material:
Diecast zinc with brass and 316 stainless steel

Backset:
55mm

Minimum door thickness:
38mm

KEY CYLINDERS FOR KITS 1-5

- Please note: For all H+B sliding lock systems you need to add in the matching/relevant key cylinder and finish
- **Important:** Cylinder is additional and unique to different kits and HB locks.
- Our cylinders are supplied same key #number per 10 cylinders of any ONE type (eg single vs double. Anything beyond this will be supplied with different keying. If you require a project beyond 10 cylinders or a mix of single cylinders vs double we are able to re-key to one key. This will take 3-4 working days and there will be an additional charge for this. Please see Alspec for more details on pricing.

FOR KIT 1, KIT 2 & KIT 3 STANDARD LENGTH – 3PIN CYLINDERS

HB 8813 STRIKER PLATES

- Please note: For all H+B hinge door lock systems you need to add in the relevant striker plate
- **Important:** Striker Plates are additional and unique to different Alspec systems refer to the below for more information

HB 8813 STRIKES (NON-HANDED)

ALSPEC CODE	DESCRIPTION	COMPATIBLE ALSPEC SYSTEM
1381114	HB8813 12mm Strike SS	Carinya French Door Air-Flo French Door
1381115	HB8813 24mm Strike SS	Swan Evo Door Carinya Door Air-Flo Door
1381116	HB8813 67mm Strike SS	Hawkesbury Bifold Door Carinya Bifold Door

HB 8813 KEY CYLINDERS

- Please note: For all H+B hinge door lock systems you need to add in the matching/relevant key cylinder and finish
- **Important:** Cylinder is additional and unique to different kits and HB locks.
- Our cylinders are supplied same key #number per 10 cylinders of any ONE type (eg single vs double). Anything beyond this will be supplied with different keying. If you require a project beyond 10 cylinders or a mix of single cylinders vs double we are able to re-key to one key. This will take 3-4 working days and there will be an additional charge for this. Please see Alspec for more details on pricing.
