

## CUSTOMER TECHNICAL MEMO # 297

**Subject** Centor SURELOCK 5 Upgrade

**Date:** 9/8/17

**Author:** Product Development Team

Centor have released the new SURELOCK 5 adjustment system, which is an upgrade to the E2 + E3 stainless steel bifold hardware. The major improvements are increased weight capacity, improved adjustment, and cleaner looks.

The upgraded performance criteria is as follows:

### ***E2 Stainless:***

**Upgraded panel weight: 60kg** (previously 40kg)

### ***E3 Stainless:***

**Upgraded panel weight: 115kg** (previously 100kg)

While the panel weights have been increased, the maximum panel size of 3000 x 1000 as specified in the Hawkesbury Bifold Door remains unchanged.

Tech Manuals will be updated with the new weight limits upon next release.

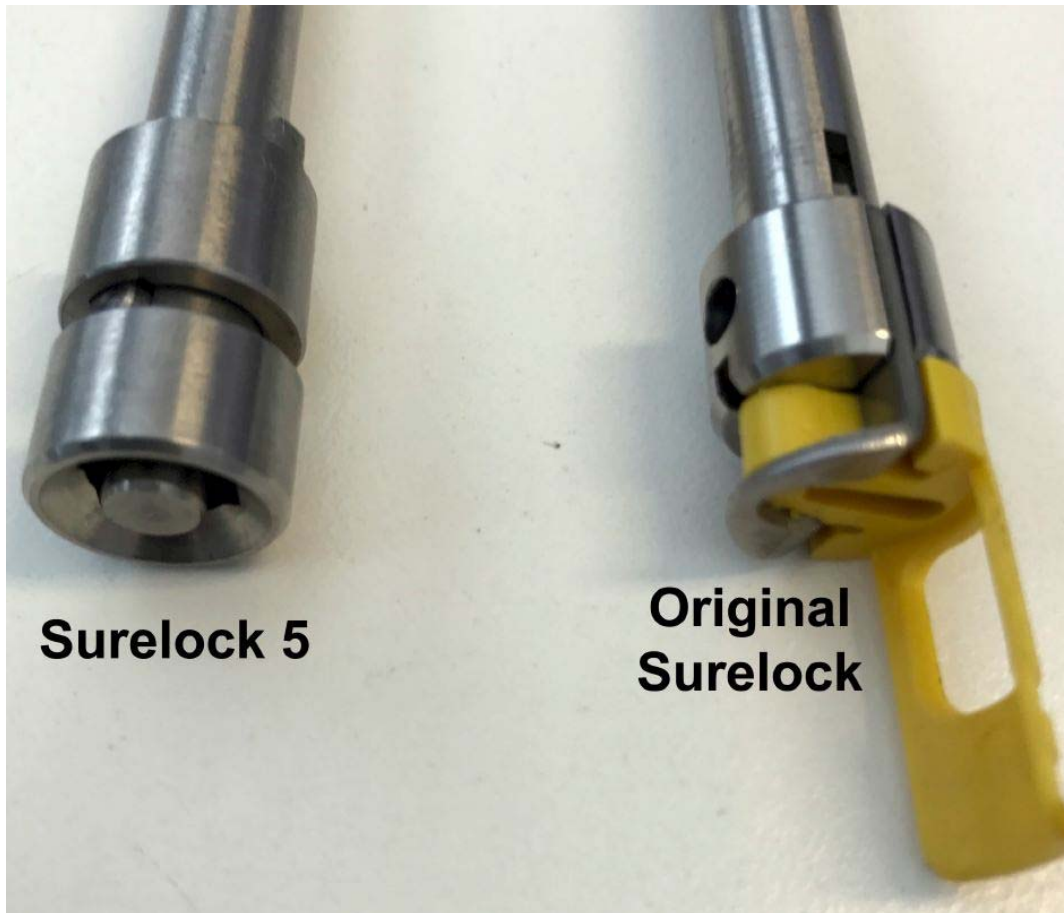

### **New SURELOCK 5 adjustment system**

The new SURELOCK 5 adjustment system is simply operated by an Allen key as per the picture below.

#### *Features*

- 8mm Allen key used for adjustment
- The extra torque from the allen key allows doors to be adjusted without being "un weighted"
- The yellow shipping clip is no longer required
- One handed adjustment
- Cleaner look
