

CUSTOMER TECHNICAL MEMO # 305

Subject Systems to be made obsolete

Date: 12th October 2017

Author: Product Development Team

With our ever growing product range, occasionally we need to review and delete suites that are no longer relevant to the market. This allows us to free up space for new systems which add value to our customer base.

We have conducted a review of our current offer and concluded that the following suites will be made obsolete.

Hawkesbury Plus

The stand alone S1 screen is the preferred solution by our customers for screening

F57 Sliding Shutter

A89 Adjustable Sliding Shutter

Emerald 64/76mm Partition Suite

PB80 51mm Partition suite

PB90/PB100 Partition suite

AP105 Partition Suite

We will remove these systems from the website, AiQ and content locker.

The dies will remain available for project specific orders of 250kgs or more per section.

Kind Regards

Product Development Team
