

CUSTOMER TECHNICAL MEMO # 169

Subject: Air-Flo French Door Product Release

Date: 24/5/13

From: Product Development

The Air-Flo French door is now available to all branches.

This French door is designed to integrate with the Air-Flo Louvre framing system allowing for screening options on the door and Louvre frame. Ideal for various entrances in residential or housing applications consisting of a 40mm thick panel that has a 85mm face to provide a premium look that is also suitable for a wide variety of lock options.

Utilising Alspec's exclusive Killara handle furniture allows for snib egress and 2 or 4 multipoint locking options. The Killara furniture is available in satin chrome and black.

Further product information is available on the website.
www.alspec.com.au/windows_doors/air-flo_french_door.php

The production Technical Manual and CAD files are accessible through the members login section.

The Tech Manual illustrates the door in an Air-Flo frame however the panel can be used in other framing systems such as McArthur, ecoFRAMEplus and Hunter by simply using a 40mm door stop.

If you have any questions contact your Local Area Manager or Sales office.
