Handle Sets

Brio's family of door furniture provides numerous options for selecting the right handle for your application. The choice can be made from cast stainless or cast alloy with various finishes.

It is available with two standard levers or a combination of one standard and one low profile lever with built in magnetic catch. This combination makes Brio's 288 ideal for folding doors as the low handle profile protects the surface of folding panels while the magnetic catch securely holds the access door open.

85mm PITCH

Recommended for Carinya Hinge Doors, AirFlo, Hawkesbury & Carinya Bifolds

286 DUAL POINT LOCK KITS

Dual Point Lock Kits

Large, folding doors which open your inside world to the outdoors are a luxury but security is a necessity which is why Brio has developed the 286 Dual Point Lock, a single action handle providing a stylish alternative to two flush bolts.

The integrated face plate for locking options produces an elegant and minimalist aesthetic while the Euro cylinder provides high security and a convenient low profile key, specifically developed for use with folding panels.

The clean, elegant lines of the integrated escutcheon are reflected in Brio's new 288 matching lever furniture

Key Features

- Low profile lever with 180° operation
- 25mm simultaneous throw into the head and sill
- Ø12mm Stainless Steel 'D' Tip
