

286/288 DOOR FURNITURE

proudly partnered with

Brio®

Watch your adventurous architectural ideas unfold into exciting reality with the Brio range of sliding and folding door hardware. Brio is passionate about shaping the spaces in which people live, work and play. With subsidiaries in the UK and USA - Brio is recognised by architects worldwide as a leading design and manufacturing company.

Brio's R&D department brings a strong design element to the business, developing and testing ground breaking concepts that continue to be at the forefront of the industry. So it's no surprise our name Brio translates to Energy, Spirit and Vitality - the core values that drive us to always discover new solutions for our customers.

Handle Sets

Brio's family of door furniture provides numerous options for selecting the right handle for your application. The choice can be made from cast stainless or cast alloy with various finishes.

Brio's 286 dual point lock is available in non-locking or locking with a discreet back plate which hides fixing screws when the handle is down and the panel is in its closed and locked position. The locking version is supplied with a high quality Euro Cylinder and specifically designed low profile key.

The 288 matching lever furniture operates with an 85mm centre lock.

Dual Point Lock Kits

Large, folding doors which open your inside world to the outdoors are a luxury but security is a necessity which is why Brio has developed the 286 Dual Point Lock. Specifically designed for timber and aluminium folding panels to offer a single action handle as a stylish alternative to two flush bolts.

Our patented design fully integrates with Brio's Weatherfold 4s with no fuss fixing hinge points but can also be used with single hinged panels (i.e. French doors). 180° operation of the low profile lever, delivers ultimate strength security of a 25mm throw into the head and sill simultaneously for panels up to 3.5m high.

Our integrated face plate for locking options produces an elegant and minimalist aesthetic while the Euro cylinder provides high security and a convenient low profile key, specifically developed for use with folding panels.

The clean, elegant lines of the integrated escutcheon are reflected in Brio's new 288 matching lever furniture which functions with an 85mm centre lock.

Lockable 2.5m kits
