

SUPASEAL PU SEALANT

"The polyurethane sealant free of Isocyanate and other hazardous raw materials"

Proudly partnered with

PRODUCT DETAILS

SupaSeal PU is a one part, moisture curing Hybrid Technology Sealant that displays excellent performance characteristics including +/- 25% Joint Movement capability. SupaSeal PU has been carefully developed to be low modulus, meaning that it is easy to extrude, is easy to tool and maintains Non-Slump characteristics, even in high temperature and high humidity climates.

SupaSeal PU is a technically advanced material designed for Construction & Industrial sealing applications, while also offering the end user a safe, less hazardous material to work with on a daily basis. Most importantly, SupaSeal PU is Isocyanate Free and contains no solvents. Available in single 960g sausage or in box of 20.

FEATURES

- Tools beautifully.
- No slump.
- Easiest clean up.
- No smell.
- Bonds to anything.
- Great skinning time.

APPLICATIONS

- Construction Join Sealant
- Vertical and horizontal expansion joints
- Non fire rated pipe penetrations
- Perimeter seals around doors, windows and facades
- General purpose interior joint sealant applications
- Sealing and bonding metal roofing systems
- Automotive and marine applications requiring a flexible adhesion profile between substrates
