

CUSTOMER TECHNICAL MEMO # 145

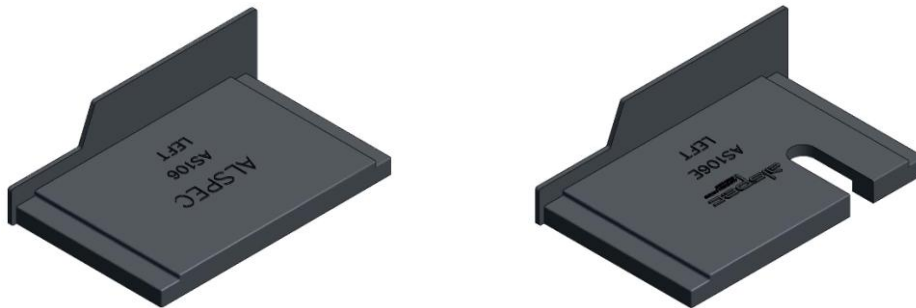

Subject: New AS106E End Caps

Date: 9/7/12

From: Product Development

We are please to advise that we have upgraded our AS106E End Caps to include a 10mm x 30mm slot to allow for jamb drainage of any water back into the sub sill.

Please see below images of the old (left) and the new End Cap (right) showing the differences.

The new End Caps will be available from the beginning of August and will replace the old product which will be obsolete.

For ease of ordering, we will retain the old code and description.

If you have any questions please do not hesitate to contact your Area Manager or local ALSPEC office.
