At the moment we have a variety of stock in small quantities around the country. To better service you we will consolidate all of our stock in Melbourne who will act as the National Stockist for these sections. This will mean we should have some stock of the key sections around when we need them.

The sections marked 'Y' in the Project Only column will not be stocked. They will be available only in mill quantities for specific projects. This will be reflected in Tech Manuals and on Wall Charts.

Kind Regards

Product Development Team
