

CUSTOMER TECHNICAL MEMO # 303

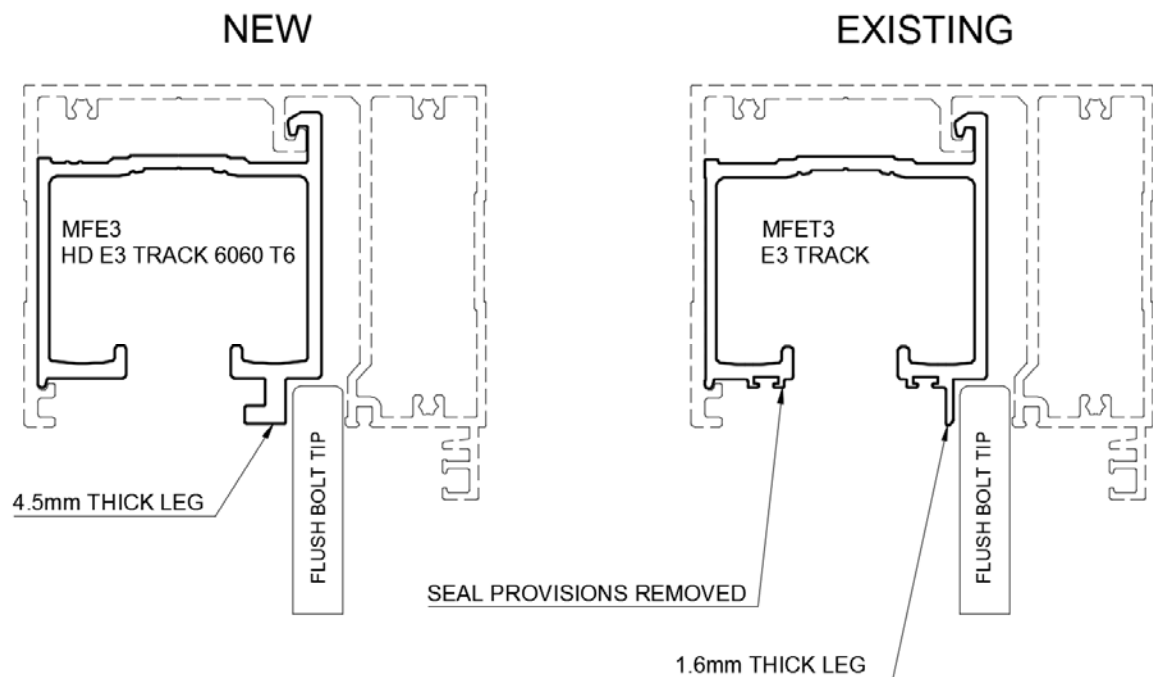

Subject HAWKESBURY MFE3 HD HEAD
TRACK UPGRADE

Date: 4/10/17

Author: Product Development Team

We are pleased to advise that the MFET3 head has been upgraded to eliminate the need to reinforce the thin flush bolt retention leg with a 6mm flat bar as previously detailed in our tech manuals.

The new MFE3 extrusion is now offered in T6 temper as standard and the flush bolt retention leg has been increased from 1.6mm to 4.5mm. The unused brush seal provisions have also been deleted for a cleaner look.

Kind Regards

Product Development Team
