

CUSTOMER TECHNICAL MEMO # 63

Subject: AS40 40mm McArthur Door Stop

Date: 4/6/09

From: Product Development

We have designed and cut a new door stop 'AS40' to be used for 40mm doors with the 101.6mm McArthur Framing.

The ALSPEC code is **600360 – AS40 MCARTHUR DOOR STOP**

The seals to be used with AS40 are DB1 (376402) or PS45 (377901). Refer to the Seal selection charts found on the wall charts or in the Tech manuals.

Previously AS35 has been used for a 40mm door when using McArthur framing. This is now to be considered as an alternate door stop for this application, and should only to be used if AS40 is not available. Please note if AS35 is used as a 40mm Door Stop with McArthur 101.6mm Framing you will need to ensure 376306 (F1424) is used to achieve a compressed seal when the door is closed. AS35 will still be used in our Partition and Hunter framing where nominated.

All the above information can also be found on the latest wall charts, technical manuals and updated on the ALSPEC website as well as V6.

If you have any questions please do not hesitate to contact your local Area Manager or sales office.
