

## ALSPEC BRINGS THE OUTSIDE IN

**A**LSPEC is a company committed to excellence in the supply of aluminium extrusions, systems, rolled products, hardware and accessories to the architectural, industrial and home improvement markets. Australian owned and with a national network of over 300 staff and 7 warehouses, ALSPEC understands that continued product innovation and developing lasting relationships are the keys to staying ahead in an ever-changing Australian environment.

With increased customer demand for the space-transforming benefits of folding exterior door systems, ALSPEC has created the dynamic Hawkesbury Multi-Fold Door Suite, to revolutionise the way we think about indoor and outdoor spaces.

Designed with large floor-to-ceiling applications in mind, the Hawkesbury Suite combines full-sized commercial perimeter framing with specially designed commercial door stiles.

A functional alternative to traditional door units in commercial and residential applications, the Hawkesbury E2 Door Suite removes the barriers to allow flow between indoor and outdoor living. Powered by exclusive hardware from Centor Architectural, the door features top-rolling operation for smooth, trouble-free operation whether config-

ured for indoor or outdoor stacking, with an odd or even number of door stiles. The stabilising central hinge controls door stile deflection and bowing on tall doors, while the exclusive Surelock™ system allows for simple vertical height adjustment with nothing more than a screwdriver.

The Hawkesbury E3 replicates the high standards set by the Hawkesbury E2, but in a heavy-duty package suited to the full gamut of commercial and residential applications. It responds to the demand for larger door panels with the noise and temperature insulating properties of double-glazing.

The Hawkesbury doors are available in a range of powder-coated aluminium finishes to suit any building colour scheme and can be fixed with industry-standard handles and locks, which are also available from ALSPEC. Whether the doors are open in fine weather or securely fastened into place as sturdy impenetrable walls, the ALSPEC Hawkesbury Door is the only choice. They make a perfect addition to icön Bar & Bistro over Queensland's Raby Bay Harbour and Marina, where the wide multi-fold opening allows for the flow between indoor and outdoor relaxation and dining.

1, 2, 4, 5. Large open spaces at Icon Bar and Bistro, Raby Bay, QLD.  
3. The ALSPEC 304 stainless steel carrier set.

**PRODUCT**

Hawkesbury Multi-Fold Door Suites E2 and heavy-duty E3
