

The Triser Hardware range finds its inspiration in the striking square, sharp edges of the iconic 12 Apostles along the Great Ocean Road. Just as these natural marvels stand proudly against the elements, our hardware range embodies their strength and beauty, creating a lasting impression wherever they are installed.

Designed in Australia.

Inspired by Australia.

TRISER SLIDING DOOR MORTICE LOCK

Triser®
HARDWARE BY ALSPEC

alspec®
EVERYTHING ALUMINIUM
& HARDWARE

Scan for Fitting Instructions

Keying:

- Accepts Alspec euro profile fixed cam cylinders, half and double.
- Can be keyed alike.
- Cylinders are not included in the kits. (See Page 8 for options)

Overview:

The Triser Sliding Door Mortice Lock has been engineered with a low-profile design and incorporates anti-lift and anti-lock features, enhancing its durability and lifespan. The anti-lock feature protects the strike and locking mechanism from getting damaged. These locks are compatible with doors with a minimum thickness of 33mm and a maximum thickness of 45mm. The brass twin locking prongs are operated by the snib located within the flush handle. The key cylinder does not drive the lock bolt itself but dead bolts the lock after the snib has been thrown. Its clean, minimalist look is achieved by its flush mounting tabs and concealed handle furniture.

Features:

- Integrated anti-lock pin to prevent damage to the locking brass bolt mechanism and strike in case of accidental door shut.
- Flush furniture design showcases its clean, minimalist design.
- Specially designed furniture fixing prongs hold the furniture plates tightly against the aluminium section.
- The brass locking bolt has twin locking prongs which secure door by inbuilt anti-lift feature.
- The lock body is available in 33mm and 55mm backset.
- 20mm narrow-width face plate.
- A 25mm wide retro face plate adaptor available as a spare part. (See Page 2)
- Alspec- designed Allen key included in each door kit to assist in furniture installation.

Installation Features:

- Triser Sliding Door Mortice Locks are suitable for door lock stiles with a thickness ranging from 33mm to 45mm.
- Suits both left-hand and right-hand sliding doors.
- The lock kits come with flush mounting tabs and various keeper options.
- Fitting instructions can be downloaded from www.alspec.com.au or QR code.

Finishes:

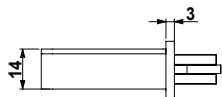

- Available in black, white, satin chrome, medium bronze and dark bronze.

AL33 SERIES

Backset – 33mm

AL55 SERIES

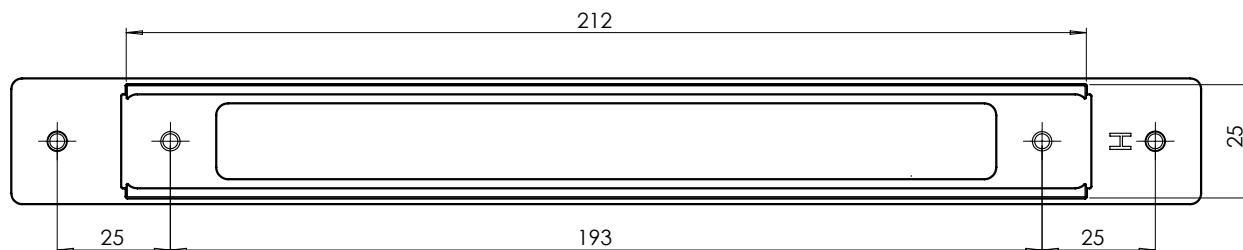

Backset – 55mm

The Triser Sliding Door Mortice Lock set series allows several snib and key lock functions for sliding doors. Sliding the snib on either side operates the bolt unless a cylinder is engaged.

A cylinder will lock the snib; the key does not operate the bolt.

Retrofit faceplate available to replace 25mm wide faceplate lock option.
